

INTERNET SAFETY

2020

How can you be safe on the internet?

Firstly, remember not to share your personal information or details to people you don't know. If it happens, then tell a adult that you trust.

Secondly, approximately 90% of people do say the truth of who they are whilst others lie and can scam you. You can not trust who your talking to unless you know them.

Thirdly, do not put a picture of you as it can show who you are so instead use pictures from the internet or use an avatar.
